THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

1. An Engineer Officers' School is located on the right bank of the Oder River, going downstream, halfway between the river port of Popowice (Dreihoeften-P51/H30) and Redziny.
2. A clearing, 200 meters wide, is used as a training area. The clearing widens until it reaches a wooded area. Beyond these woods are buildings which are thought to be barracks for the school.
3. The training area and the wooded section are surrounded by barbed wire and are patrolled by guards. At the edge of the training area, near the woods, there is an entrance to an underground installation, the function of which could not be determined. The installation is guarded by one sentry during the day and two by night.
4. About ten motor launches and 100 pontoon boats as well as many kinds of bridge-building equipment and materials were observed. Approximately 300 soldiers were seen building pontoon bridges and engaging in various types of training exercises.
